

**ARDEN 20****CLAY BASED GREASE****DESCRIPTION**

Veedol Arden 20 is non-soap clay based chemically stable grease.

APPLICATIONS

Recommended for plain and anti-friction bearings where extremely high temperatures are encountered.

FEATURES/BENEFITS

- Can withstand very high temperatures without softening or melting.

CAUTION: In bearings operating at temperatures above 200°C the grease should be replenished at frequent intervals.

CHARACTERISTICS

Test Parameter	Test Method	Typical Value
Texture	–	Smooth
NLGI Consistency	–	2
Soap Type	–	Non-soap
Worked Penetration, 60st @25°C	ASTM D 217	275
Drop Point, °C	ASTM D 2265	258
